

# Project – School Performance Report

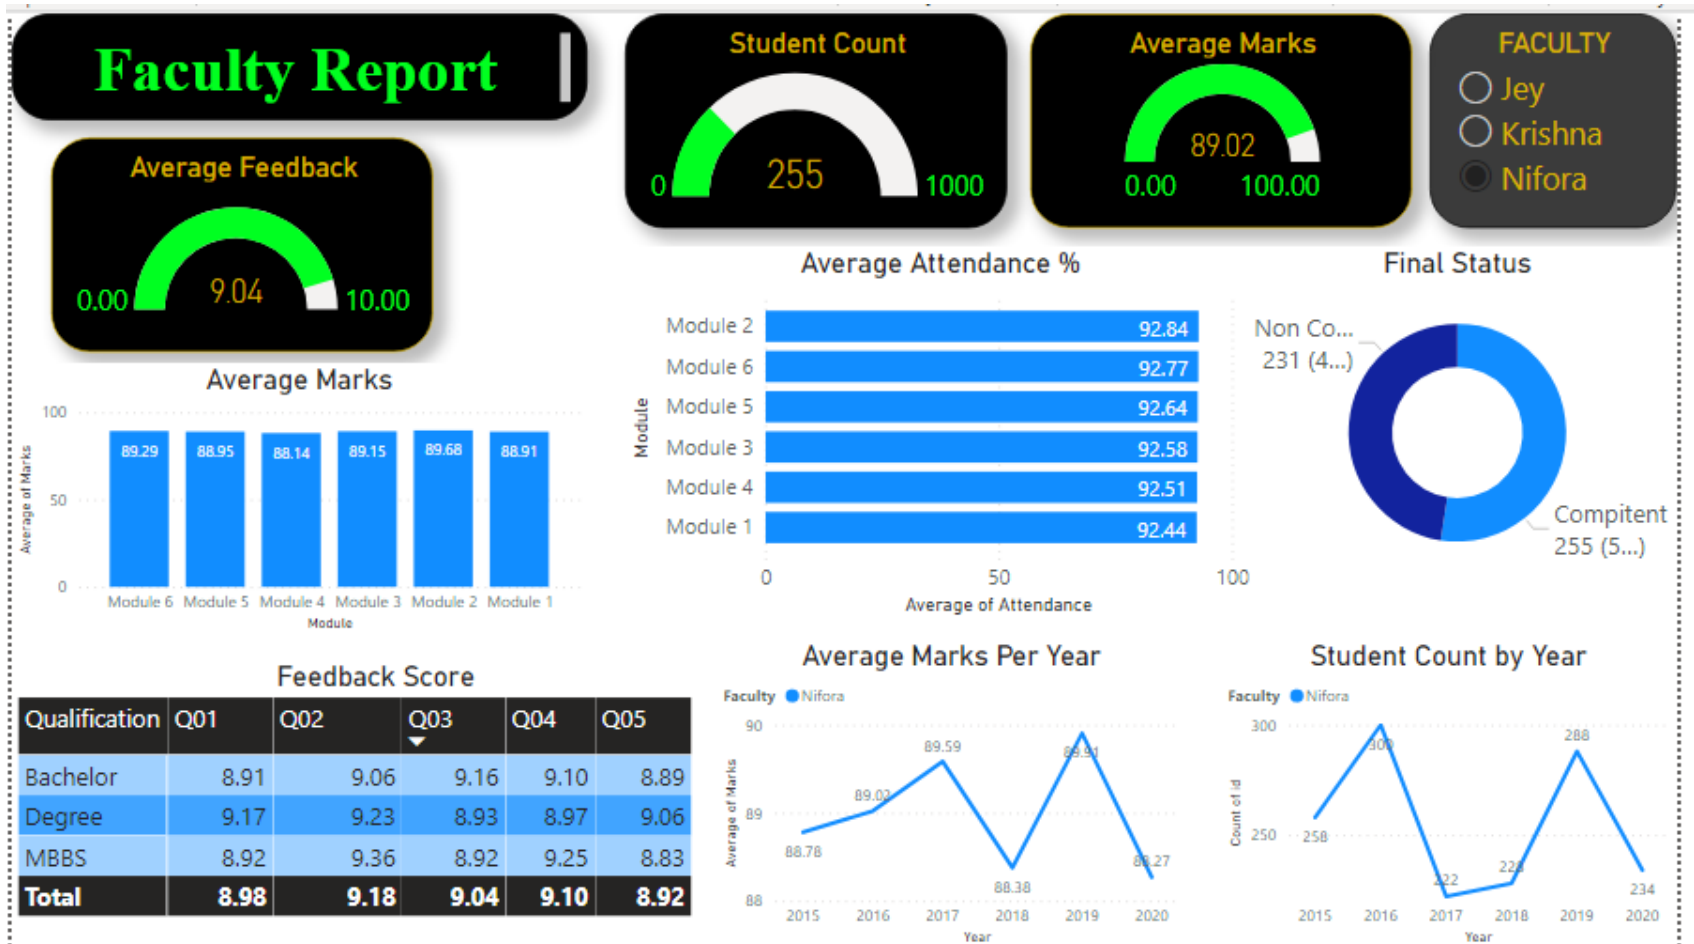

XYZ school is providing education in many domains such as Arts, Engineering & Science and has students from different countries. You have been assigned the task to use some visualisation techniques to analyse the performance of the school. Three reports needs to be created:

## 1) Student Report – Highlighting the individual performance of the stud

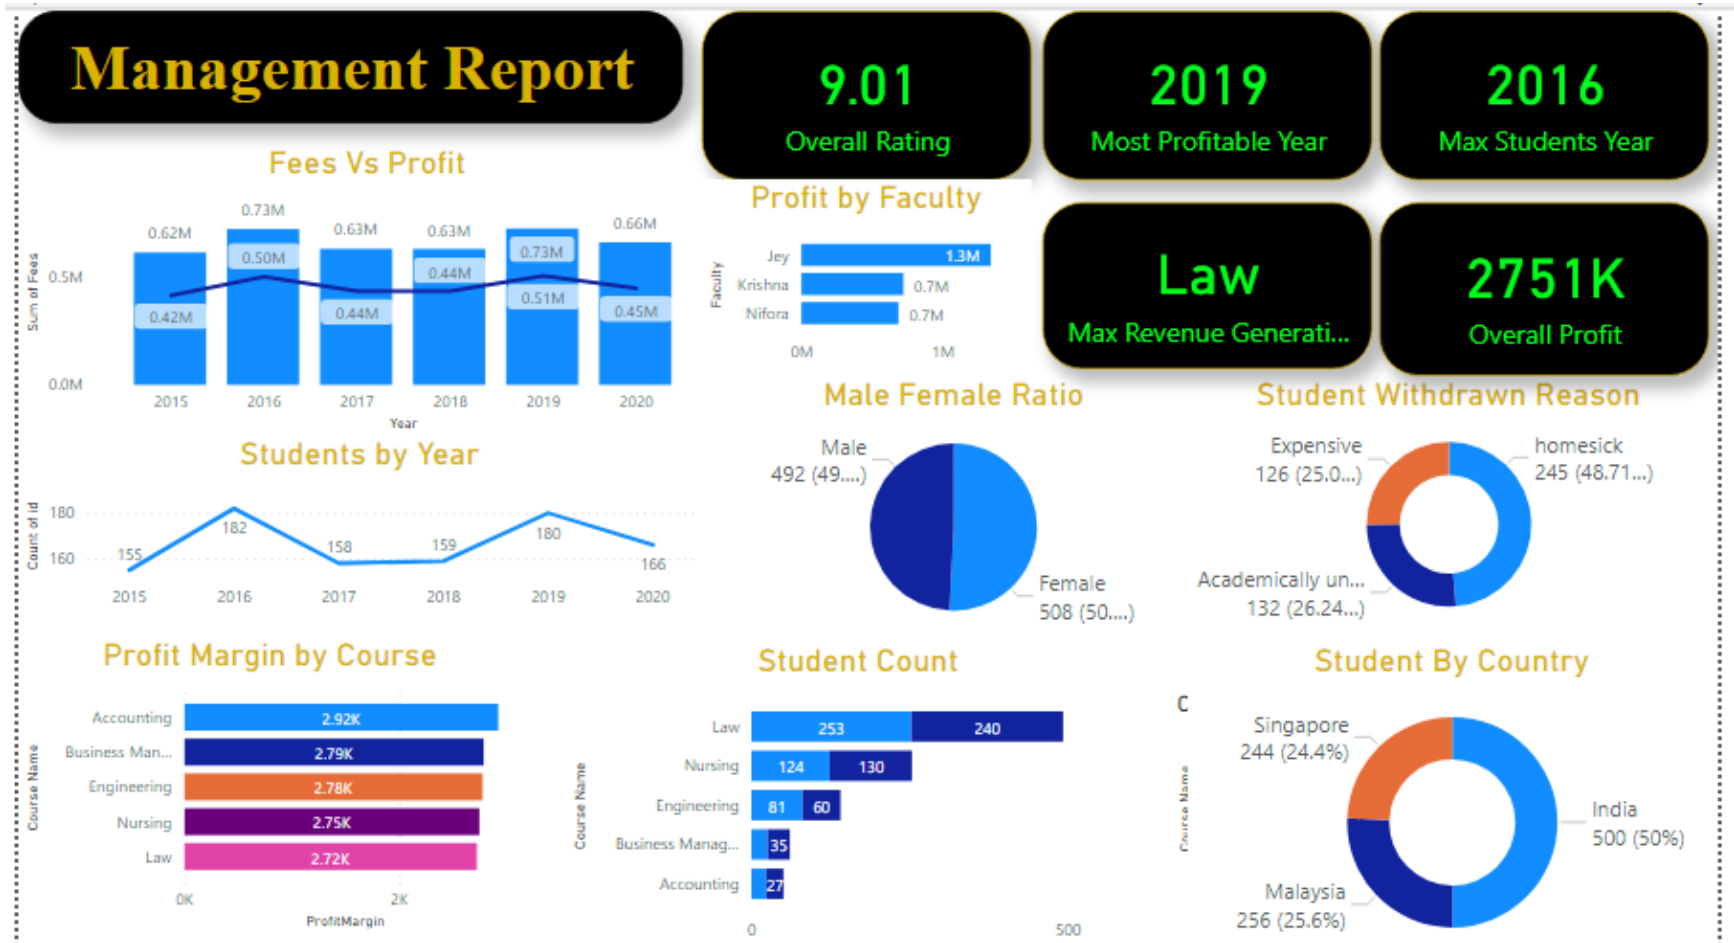

# Project – School Performance Report

## 2) Faculty Report - To monitor the performance and rating of the faculty

# Project – School Performance Report

3) Management Report - To analyse the factors influencing the profit and loss.

*Thanks!*
